1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Figure 6 of Borland teaches an actuated solenoid valve with an annular valve seat. However, the gas inlet orifice in Borland is also the internal aperture for receiving a valve actuator wherein there are not two aligned passages as claimed. Benson et al., Davenport and Behle teach other gas cylinder valves.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a method or apparatus that includes a valve body with an internal aperture for receiving a valve actuator and a threaded extension for connecting with a gas cylinder with the threaded extension having a gas inlet orifice in alignment with the internal aperture for the valve actuator with the valve actuator including a movable annular valve seat wherein valve seat material is adjacent to and surrounds the gas inlet orifice and is contacted by the annular valve seat on the actuator as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 571-272-4889. The examiner can normally be reached on Wed. thru Fri. 9AM-7PM, Mon. 7AM-1PM.
